

Wireless Entertainment System for coaches
Visit "OmdisNet" on busworld Kortrijk, stand 936b

Mainz/Kortrijk: Watching movies, listening to music, reading magazines and travel informations or surfing the internet. Passengers can enjoy all this with their own mobile devices on demand: With „OmdisNet“.

OmdisNet offers entertainment and service for the passengers on board: "While I watch the latest James Bond-Movie, I can switch on a children's film for my son", reports a passenger. His wife adds: "Accessing the entertainment program individually with my own tablet-pc means is real enhancement of comfort to me."

OmdisNet offers highest level of service for bus companies, too. The entertainment server can easily be installed, (no installation of monitors on the bus, just one server has to be plugged in). Beyond easy handling OmdisNet offers a "Full Service" for bus companies: The media package containing of movies, music, papers, magazines and travel information comes pre-installed with the server. Omdis Media takes care of the rights management and the updates. If elderly buses have to be replaced, the OmdisNet Servers can easily be taken to the new buses.

"We have been running OmdisNet for several weeks on our buses now. The installation was easy, the updates run automatically. We can present our whole travel catalogue, special offers, travel guides, and the onboard food and drinks menu via OmdisNet to our guests on board", says Marco Schuy, bus company owner and managing director of Omdis Media. "Our passengers are excited. We are looking forward to presenting OmdisNet to an international audience on the busworld in Kortrijk."

Visit us on busworld in Kortrijk,
Hall 9, Stand 936b, and test OmdisNet "live".
