

Naili Europe presents new oil free air compressor.

Naili compressor Europe presents their new oil free air compressor after being in the market for 12 months in China now, resulting in the replacement of the rotary vane compressor Naili used to supply and staggering sales figures.

The product range, with permanent magnet motors from 0,85 up to 4 kW, has a maximum compressor capacity of 380 L/min and is intended for the electrical vehicle market such as busses, trucks and others.

Reliable long maintenance intervals of 6000 hours, low temperature service down to -40°C up to 65°C , low noise levels of 75 dB(A) and the compact envelope sizes will certainly make the compressor as popular in Europe as it is in the worlds biggest market for electric vehicles.
