

Invitation to see Equipmake's new electric bus chassis at Busworld Europe – October 17-18th

We would like to invite you to visit UK automotive electrification company, **Equipmake** (<https://equipmake.co.uk>) at Busworld Europe next week where it will reveal the very latest version of its innovative electric bus platform.

Located in **Hall 1, Stand 105c** from 17th October, Equipmake's EBus drivetrain features a number of innovations that greatly improve efficiency and cut cost. For example, by optimising the heating and cooling of the vehicle, EBus minimises energy use and allows smaller batteries to be fitted.

Available as a completely integrated and modular chassis, Equipmake's EBus powertrain allows coachbuilders with no EV knowledge to become an electric bus manufacturer, cost-effectively. The platform also features Equipmake's own electric motor technology, which has been bred from Formula One.

More details will follow next week, but in the meantime, to arrange an interview with Equipmake's Managing Director, Ian Foley, on 17th or 18th October please do get in touch.
