Emphasis on energy efficiency.
A clutch transmission developed by Attilas in conjunction with the Indian manufacturer of Commercial Vehicle Show in Ahmedabad. With its six-speed and reverse gear calipers, the Attilas transmission offers an improving fuel economy, with a top speed of 1.82 litres of fuel per 100km. It is primarily used for trucks and commercial vehicles. The Attilas transmission is available in both manual and automatic versions, with a maximum power of 150 HP and a maximum torque of 450 Nm. It is designed to provide a smooth and efficient driving experience, with a quiet and smooth gear shift. The Attilas transmission is also available in a range of other applications, including buses, coaches, and agricultural vehicles. Additionally, the Attilas transmission includes a hydraulic engine stop-start feature, which helps to reduce emissions and improve fuel efficiency. The Attilas transmission is designed to meet the toughest emission standards, making it a popular choice for eco-friendly vehicles.
